

## Basic Principles Governing the Development of this Plan

1. Promote Cost-Effective Approaches: In these times of high and increasing costs of most health care services, North Carolina is committed to promoting cost-effective approaches to the provision and purchase of health services. The Department of Health and Human Services encourages the development and use of cost-effective alternative approaches to health care delivery by providers of care, consumers and third-party payers. The Department encourages the development of health care delivery networks, accountable health plans, accountable health carriers, community care networks, integrated delivery systems or any system which provides for most cost-effective delivery of health care services through collaborative efforts among health care providers. Other examples of cost-effective approaches include the development of prepaid health plans, appropriate uses of out-patient treatment modalities, community-based services, innovative reimbursement programs, and conversion of underutilized existing facilities to uses for which there is a demonstrated need.
2. Expand Health Care Services to the Medically Underserved: The Department of Health and Human Services recognizes the need to ensure access to health care in as equitable a manner as possible. Individuals who are medically underserved include low-income people, racial and ethnic minorities, and disabled people.

It is important to recognize that a variety of public funds are used to address the needs of the medically underserved, including Medicare, Medicaid, State and local funding of public health clinics and community mental health centers, local funding of community hospitals, and some State programs that help individuals with specialized health problems (i.e., Children's Special Health Services Program, Sickle Cell Anemia Program, Sudden Infant Death Syndrome Program, etc.). In addition, many providers serve low-income people by increasing the charges paid by insured patients, although the extent of this cost-shifting is not always known. As the health care system becomes more competitive, providers may be forced to decrease their cost-shifting practices, resulting in an increased reliance on public funds or a decrease in services available to the medically underserved.

3. Encourage Quality Health Care Services: The Department of Health and Human Services is committed to assuring citizens of North Carolina adequate access and availability to quality health care at a reasonable cost.

The Department of Health and Human Services recognizes the practical limits of this commitment, i.e., the Department of Health and Human Services does not have resources adequate to guarantee each citizen access to every health service that could possibly benefit that person throughout her/his lifetime. Therefore, the Department, in allocating its available resources, gives priority to health services which are considered to be: a) cost-effective, and b) potentially beneficial to the majority of North Carolina's citizens. Further, the Department of Health and Human Services will attempt to influence resource allocation decisions by other public and private entities in the same direction. Trade-offs among cost containment, access and quality complicate decisions about acceptable or desirable levels of care as well as the trend toward using complex technology, treating a greater mix of cases, and dealing with more chronic conditions. In spite of these complexities, it is important that quality of care be assured.

### **POLICY HH-3: NEED DETERMINATION FOR MEDICARE-CERTIFIED HOME AGENCY IN A COUNTY**

When a county has no Medicare-certified home health agency office physically located within the county's borders, and the county has a population of more than 20,000 people; or, if the county has a population of less than 20,000 people and there is not an existing Medicare-Certified Home Health Agency Office located in a North Carolina County within 20 miles, need for a new Medicare-Certified home health agency office in the county is thereby established through this policy. The "need determination" shall be reflected in the *next* annual State Medical Facilities Plan that is published following determination that a county meets the criteria indicated above. (Population is based on population estimates/projections from the North Carolina Office of State Budget and Management for the plan year in which the need determination would be made excluding active duty military for any county with more than 500 active duty military personnel. The measurement of 20 miles will be in a straight line from the closest point on the county line of the county in which an existing agency office is located to the county seat of the county in which there is no agency.)

---

### **POLICIES RELATED TO END-STAGE RENAL DISEASE DIALYSIS SERVICES (ESRD)**

---

#### **POLICY ESRD-1: AVAILABILITY OF DIALYSIS CARE**

*This former policy was edited and moved to the narrative of "Chapter 14: End-Stage Renal Disease Dialysis Facilities" in the 1998 Plan.*

#### **POLICY ESRD-2: RELOCATION OF DIALYSIS STATIONS**

Relocations of existing dialysis stations are allowed only within the host county and to contiguous counties currently served by the facility. Certificate of need applicants proposing to relocate dialysis stations to contiguous counties shall:

1. demonstrate that the proposal shall not result in a deficit in the number of dialysis stations in the county that would be losing stations as a result of the proposed project, as reflected in the most recent Dialysis Report, and
2. demonstrate that the proposal shall not result in a surplus of dialysis stations in the county that would gain stations as a result of the proposed project, as reflected in the most recent Dialysis Report.

---

## CHAPTER 12

### HOME HEALTH SERVICES

---

#### Summary of Medicare-Certified Home Health Agency Supply and Utilization

In the Fall of 2007, the North Carolina Division of Health Service Regulation reported 216 Medicare-Certified home health agencies in North Carolina.

Data from the "Home Health Agency 2007 Annual Data Supplements" indicated a total of 179,099 home health patients were served during 2006 (FY 2005-2006). This represents a 5.8% increase in the reported number of patients from 2005. Compared to 2005 data, the average "State Use Rates per 1000 Population" increased in four age groups, as follows:

<u>Age Group</u>	<u>2005 Use Rate</u>	<u>2006 Use Rate</u>
Under Age 18	3.44	3.55
Ages 18-64	9.62	10.03
Ages 65-74	62.77	62.96
Ages 75 & Over	156.30	163.13

#### Changes from the Previous Plan

No substantive changes have been made in the home health policy, assumptions or methodology. For the North Carolina 2008 State Medical Facilities Plan, references to dates have been advanced one year.

#### Basic Assumptions of the Method

Assumptions underlying the projection of need for new Medicare-Certified home health agencies or offices are as follows:

1. The target for projections should be one year beyond the Plan Year, to allow time for completion of the Certificate of Need review cycles and for staffing of new agencies or offices.
2. Data aggregation and projections should be accomplished by four age groups (*Under Age 18, Ages 18-64, Ages 65-74, and Ages 75 and Over*) to allow more definitive examination of trends in services to children and to senior adults.
3. Current age-specific use rates are the most valid bases for projection of future "need."
4. Because previous year's data are used as the bases for projections, the average annual rate of change in "number of patients served" should be calculated over the

previous three years for each age group in each Council of Governments (COG) Region and applied to current reported total number of patients served from each county within each COG Region, to project changes in the capacity of existing agencies to serve people from each county by the target year.

5. Likewise, the average annual rate of change in "use rates per 1000 population" should be calculated over the previous three years for each age group in each Council of Governments Region and applied to current "use rates per 1000 population" for each county within each COG Region to project changes in the number of potential people needing home health services by the target year.
6. A new agency or office is needed if the projected unmet need in a single county is 400 patients or more.
7. When the need for additional agencies or offices is determined by the standard methodology or policy in the State Medical Facilities Plan, the three annual Plans following certification of the agencies or offices based on that need (*during the time when the new agencies or offices are being established and are developing their services*) should count the greater of 400 patients for each new agency office or the actual number of patients served by the new agency office as part of the total people served.
8. The North Carolina State Health Coordinating Council encourages home health applicants to:
  - a. provide an expanded scope of services (*including nursing, physical therapy, speech therapy, and home health aide service*);
  - b. provide the widest range of treatments within a given service; and
  - c. have the ability to offer services on a seven days per week basis as required to meet patient needs.

#### **Sources of Data**

##### **Population:**

County population projections by age group for 2009 were obtained from the North Carolina Office of State Budget and Management.

Estimated active duty military population numbers were excluded from the 18-64 Age Group for any county with more than 500 active duty military personnel. These estimates were obtained from the "Selected Economic Characteristics" portion of the 2000 Census, under the category of "Employment Status – Armed Forces."

**Utilization:**

Patient origin data were compiled from "Home Health Agency 2007 Annual Data Supplement(s) to License Application" as submitted by Medicare-Certified home health agencies to the North Carolina Department of Health and Human Services, Division of Health Service Regulation.

**Application of the Standard Methodology**

Steps in applying the projection method are as follows:

- Step 1: For each COG Region, for each age group, calculate the "Average Annual Rate of Change in Number of Home Health Patients" over the previous three years.
- Step 2: For each COG Region, for each age group, calculate the "Average Annual Rate of Change in Use Rates per 1000 Population" over the previous three years.
- Step 3: For each county, for each age group, total the number of home health patients served in 2006 as reported from agencies' "Home Health Agency 2007 Annual Data Supplement(s) to License Application."
- Step 4: For each county, multiply the "Average Annual Rate of Change in Number of Home Health Patients" for each age group from the affiliated COG Region, times the number of patients for each age group from Step 3.
- Step 5: Multiply the product from Step 4 by three (*to advance by three years*), and add that product to the base figure from Step 3 for each age group. The result is the anticipated number of patients which might be served by existing agencies in 2009 for each age group.
- Step 6: For each county, for each age group, divide the number of patients served in 2006 by the county's population (*in 1000's for each age group*). This produces use rates per 1000 population for the county.
- Step 7: Multiply the "Average Annual Rate of Change in Use Rate per 1000 Population" for each age group from the affiliated COG Region times the county use rates per 1000 population for each age group from Step 6.
- Step 8: Multiply the product from Step 7 by three (*to advance by three years*), and add that product to the base figure from Step 6 for each age group. The result is the anticipated use rate per 1000 population in 2009 for each age group.

- Step 9: For each age group, multiply the anticipated use rate per 1000 population for 2009 times the projected 2009 population. The result is the potential number of home health patients in 2009.
- Step 10: In counties for which additional home health agency office need determinations were made by the standard methodology or policy (see the seventh "Basic Assumption"), determine the difference between 400 and the number of patients actually served by each new agency in the county for which a need determination was made. If a new agency office served more than 400 clients, the agency's reported number of patients is not adjusted. If a new agency office served fewer than 400 clients, an adjustment "placeholder" equal to the difference between the reported number of home health patients and 400 is used.
- Step 11: For each county, sum the anticipated number of patients which may be served in 2009 (from Step 5) across all four age groups and the adjustment placeholder (from Step 10), if applicable. The result is an "Adjusted Potential Total People Served" for each county for 2009.
- Step 12: For each county, sum the potential number of home health patients in 2009 (from Step 9) across all four age groups. The result is the "Projected Utilization in 2009."
- Step 13: For each county, subtract the "Projected Utilization in 2009" from the "Adjusted Potential Total People Served." The remainder is the projected additional number of home health patients which will need home health services in 2009 (unmet need shows as a negative number of patients, *i.e.*, a "patient deficit").
- Step 14: For each county, need for one new Medicare-Certified agency office is determined for each projected deficit of 400 patients. (A Medicare-certified home health agency office's service area is the Medicare-certified home health agency office planning area in which the office is located. Each of the 100 counties in the state is a separate Medicare-certified home health agency office planning area.)

\* Adjustments for "Active Duty Military Personnel" have been applied to the "Age 18-64" population projections for these counties

\*\* A projected deficit of 400 patients is the threshold of need for a new home health agency or office

**Table 12D: Medicare-Certified Home Health Agency or Office Need Determination**  
*(Scheduled for Certificate of Need Review Commencing in 2008)*

County	HSA	Number of New Home Health Agencies/Offices Needed	Certificate of Need Application Due Date	Certificate of Need Beginning Review Date
It is determined that there is no need for additional Medicare-Certified Home Health Agencies or Offices anywhere in the State and no reviews are scheduled.
